## **DETAILED ACTION**

### ***Response to Amendment***

The Amendment, filed on June 20, 2005, has been entered and acknowledged by the Examiner.

Claims 1-19 are pending in the instant application.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Pursuant to MPEP 606.01, the title has been changed as follows,

-- METHOD OF FABRICATING AN INCANDESCENT HALOGEN LAMP HAVING FLATTENED FILAMENT SUPPORT LEADS --.

### ***Allowable Subject Matter***

Claims 1-19 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of forming an incandescent lamp having an axially oriented filament, and further the steps of forming a filament having a coiled section wound about a central longitudinal axis, and attaching the filament between the second lead wire and the flattened end portion of the first lead wire

Art Unit: 2879

with the flattened end portion being oriented such that the flattened end portion lies generally parallel to the coiled section and generally within a plane that contains the longitudinal axis.

Regarding claims 2-9, claims 2-9 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 10, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 10, and specifically comprising the limitation of forming an incandescent lamp having an axially oriented filament, and further the steps of forming a filament having a central light emitting section extending along a central longitudinal axis, attaching the filament between the non-circular cross-sectional shaped portion of the first lead wire and the second lead wire, and orientating the first lead wire such that the narrow profile extends generally parallel to the longitudinal axis and is aligned in the direction of light emitted by the filament and lies within a plane substantially containing the longitudinal axis.

Regarding claims 11-16 and 18, claims 11-16 and 18 are allowable for the reasons given in claim 10 because of their dependency status from claim 10.

Claims 17 and 19 are allowable for substantially the same reasons stated in the previous office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
